BITCOIN INVESTMENT INTELLIGENCE & FORECAST

STRATEGIC INSIGHTS AND FORWARD-LOOKING ANALYSIS

30-DAY BITCOIN PRICE FORECAST

FORECAST GENERATED USING POWERBI EXPONENTIAL SMOOTHING (95% CONFIDENCE INTERVAL)

FORECAST INTERPRETATION;

The forecasting model predicts that Bitcoin is likely to remain within its recent trading range over the next 30days. The widening confidence interval suggests increasing uncertainty as the forecast extends further into the future.

RISK ASSESSMENT;

Price Trend	● Bearish
Volatility	● High
Liquidity	● Strong
Overall Risk	● Medium-High

INVESTMENT RECOMMENDATIONS ;

Short-Term Traders:

- Expect continued volatility.
- Use stop-loss orders

Long-Term Investors:

- Consider gradual accumulation through Dollar-Cost Averaging (DCA0).
- Avoid emotional buying during short-term spikes.

Model Limitations;

- Forecast is based only on historical prices between MAY 2025 - MAY 2026.
- Does not include macroeconomics news, regulation, ETF inflows, or geopolitical events.
- Should be used as a decision-support tool rather than a guarantee of future prices.
